

About us

Bergstein Digital is specialized in the development and manufacturing of professional highspeed single-pass industrial inkjet printers that can print directly on products onto a huge speeds of up to 25 meters per minute. We understand that every customer has unique printing needs.

Our modular printers can be easily configured with pretreatment, primers, colors, and curing systems using our unique industrial cassette system to fit seamlessly in your production process. Bergstein Digital has customers worldwide in the Medical, Automotive, Consumer, Packaging, Electronics and Tool Industries.

Bergstein's own development of solid ink systems, LED-lamps, and UV-lamps, as well as their innovative transport system, new cassette printhead system and sophisticated HMI software, ensuring the right solution for each customer.

Advantages of our printing solutions

01

Digital Printing Technology

- Personalization of products
- Printing on demand
- Short setup times
- High production speeds
- Constant print quality
- Contactless printing
- Inline and offline usable
- Fast to market

02

Integrated High End Transport System

- Speed variation between different print steps
- Precise and constant print process
- Product size of carriers: 800x300 mm (DIGI-5/-7) and 600x200 (DIGI-Compact/-Compact HC)

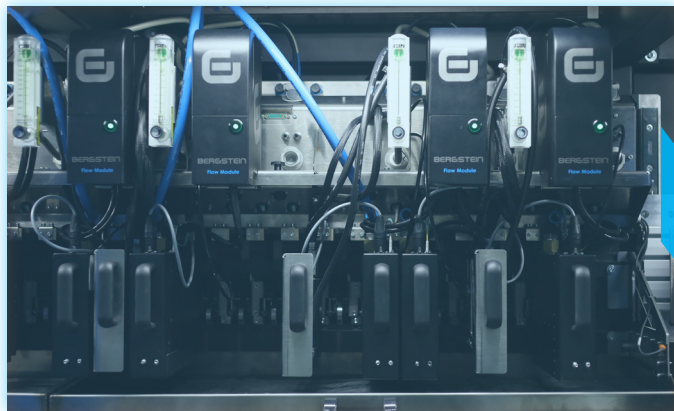

- Shuttles with cable track for extra electricity, air or vacuum on each carrier, usable for jig adjustments
- Possibility to build complex, multifunctional customer-specific jigs on carrier
- Optional: stop and go, forward and backward, different speed of carriers during print process

03

Modular Cassette System

- Easy adapting a customized print process
- Capable of changing or expanding functionality
- Capable of integrating future technology
- Little downtime during breakdown
- Shorter lead time in production
- Machine rest value higher

04

Human Machine Interface

- Easy to navigate
- Easy to understand
- Role-based access control
- Remote Access for remote support
- Multi languages

Expert Technical Knowledge

Our team is fully trained in our own printer models and has the expertise to troubleshoot and resolve any issues that may arise.

Maintenance and Repair services

We provide routine maintenance and repairs to keep your printer running at peak performance.

Expert Technical Knowledge

Our team is fully trained in our own printer models and has the expertise to troubleshoot and resolve any issues that may arise.

Software support

We understand the software used in our printers and provide troubleshooting and training for customers.

Spare Parts Availability

We keep a stock of spare parts to minimize downtime in case of a problem.

Exceptional After Sales Service

Our team is dedicated to providing quick responses to inquiries, issues and complaints, ensuring customer satisfaction.
